

Adnane Ahroum

New York, NY | +1-914-406-1771 | adnaneahroum69@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Monroe University, King Graduate School

New Rochelle, NY

Master of Data Science (Online/Evening) | GPA: 4.00/4.00

Sep. 2025 – Apr. 2027

- Academic Focus: Data Analysis, Database Design, Machine Learning

Al Akhawayn University

Ifrane, Morocco

B.S. Computer Science, Minor in Business Analytics & AI | GPA: 3.83

Aug. 2021 – May 2025

- Honors: Magna Cum Laude, 75% Excellence Scholarship

EXPERIENCE

Junior AI Data Analyst

Feb. 2026 – Present

Delta Children

New York, NY

- Supporting the development and maintenance of data pipelines and a Star Schema data warehouse, handling the data collection, cleaning, and transformation of 5+ years of e-commerce data
- Writing and optimizing SQL queries for data extraction and manipulation from relational databases and ERP systems
- Collaborating with senior team members to analyze datasets and generate insights using data visualization tools (Power BI), tracking KPIs such as ACOS and Net Margin

Data Analyst Intern

Jan. 2026 – Jul. 2026

United Nations (DOS-AMCU)

New York, NY

- Built Python and SQL data pipelines to assist in data collection and cleaning across 22 global missions, generating insights to identify underutilized assets for fleet budget reduction
- Documented ETL processes and contributed to continuous improvement initiatives by engineering a SQL-driven validation framework to resolve asset lifecycle discrepancies

Data Scientist

Summers 2024 & 2025

Orange Maroc

Casablanca, Morocco

- Analyzed complex datasets and applied Python-based data manipulation to design and deploy Orange Maroc's first conversational AI system (Whisper STT + Transformer Seq2Seq)
- Generated insights through NLP feature engineering and model tuning, driving a 15% improvement in call routing accuracy and reducing misrouted customer interactions

PROJECTS

AI Pipeline & Data Transformation | *Python, SQL, Data Manipulation*

- Architected an end-to-end data pipeline: Whisper STT transcribed speech into a Transformer Seq2Seq NMT model
- Performed extensive data cleaning and transformation on the PyDoDA corpus (30k+ entries), applying mixed-script normalization and BPE tokenization to support database design and model training

Intelligent Medical Image Segmentation | *Python, PyTorch, Data Analysis*

- Built an end-to-end data extraction and analysis pipeline on the BraTS dataset; applied automated feature engineering to support a 3D segmentation model achieving a 92% accuracy score

TECHNICAL SKILLS

Data Engineering & Analytics: SQL, Data Collection & Cleaning, Data Extraction & Manipulation, ETL Processes, Data Warehousing, Relational Databases, Data Structures

Programming Languages: Python, SQL, Java, C++, JavaScript, C

Data Visualization & Tools: Power BI, Tableau, Git, Docker, Apache Airflow, Linux/Unix

AI & Machine Learning: Data Analysis, NLP, PyTorch, TensorFlow, Pandas, NumPy
